

Bread and Beef.

It has been urged against the Canadian Tariff that it would only take the tax off bread to put it on beef. Bread and beef constitute two very important items in general well-being—except such a potent influence upon industrial development that we are disposed to give the objection careful consideration. Under the present tariff the duty on flour will average from twenty-five to thirty per cent *ad valorem*. On beef it will average about five per cent *ad valorem*. It will be admitted that the difference is enormous; and, worst of all, the difference is on the wrong side, for foreign flour the most populous part of the Colony must consume for years to come, while not another pound of foreign beef is needed. Under the Canadian tariff the duty on beef would be ten per cent,—just double of what it is now, but still only about one-third of what flour is now,—and flour would be free. Now, it will be observed that, although double of what it is now, ten per cent is a small duty on beef when compared with twenty-five to thirty per cent upon bread, and surely to increase the duty on beef five per cent, and remove a twenty-five to thirty per cent duty from bread would be a very great gain, even assuming the continued importation of both articles to be equally a necessity. But when one comes to look at the matter in the light of the fact already enunciated, viz, that we must be large consumers of foreign flour for years to come, and that there is really no necessity for our consuming another pound of foreign beef, we are at a loss to understand how any sane person could think of hesitating as to the desirability of such a change. Under the circumstances, we regard a good smart duty on beef as desirable rather than otherwise, inasmuch as it would operate as a spur to the utilization of an abundant home supply. Reasonable government aid in making a way by which cattle can conveniently reach the seaboard, and a reasonable effort on the part of the people is really all that is needed to render any duty upon beef, no matter how large, a more dead letter, in so far as the consumer is concerned. For all practical purposes the question just resolves itself into the following simple proposition: Shall we eat free bread and home-grown beef under the Canadian tariff? Or shall we continue to eat foreign bread with a tax of twenty-five to thirty per cent on it, and foreign beef with a tax of five per cent on it, the proceeds of both taxes being sent away out of the country to O. tawa? Consumer and producer, for it concerns you both, we leave you to answer.

The Fraser River Buoy.

EDITOR MAINLAND GUARDIAN—I have noticed in your newspaper several items regarding the Fraser River buoy, urging the attention of the Government to the same. So far, these complaints seem to have been disregarded, and it now becomes my duty as captain of the steamer Enterprise, publicly to state that the Fraser River buoy which cost the Government of the colony an enormous sum, are entirely out of position; that the traffic between New Westminster and Victoria is rendered dangerous by the neglect of the Government, and that the buoys, as they have at the present time drifted into false positions, are worse than useless—being calculated to mislead rather than direct the mariner. Were it not for my own intimate knowledge of the landmarks on the coast it would be impossible for me to make the trip in safety and in case of a fog I should be obliged to anchor. I leave it for the public to judge how a stranger would fare. The buoys ought at once to be placed in position and an annual survey made after the high water of the Fraser river sand-heads. I trust this will have the effect of removing a great evil, and remain, Yours truly, JOHN SWANSON, Master H B Co's steamer Enterprise.

From the San Francisco Alta, August 14.
Canadian Minister of Public Works.

Honorable Mr. Langevin, Minister of Public Works of the Dominion of Canada, whose arrival here we noticed some days ago, was visited yesterday at the Grand Hotel by a number of prominent Canadian residents of this city. Mr. Langevin is a French Canadian and is very much esteemed by his countrymen. He has been a member of the Dominion Government since the passage of the Intercolonial railway Act, and has filled various offices in the Ministry in a manner satisfactory to his colleagues and to the entire people. He is in politics a 'Blue,' or Conservative, in contradistinction to a 'Rouge,' or Liberal, but is very popular with all classes of his countrymen and enjoys their confidence to the fullest extent. Mr. Langevin's private fortune is very large, probably as large as that of any man in the country. He accepted a place in the Macdonald-Carter Ministry with a view to serve his country and assist in perfecting and carrying into effect the Confederation scheme for any other purpose. As Minister of Public Works he has shown marked ability in conducting the construction of the Intercolonial railway and other heavy works projected by the present Government. He is confident that the Canadian Transcontinental railroad will be a success and prove of immense advantage to the Dominion by opening up the Northwest Territory to settlers. The Government, he says, will give each settler 160 acres of land free as an inducement to settle, and people like the Rocky Mountains is a beautiful, fertile tract of country, with little exertion can be settled and made very productive. The difficulties to be encountered in building the Canadian Pacific railroad will, he considers, be less than those which presented themselves in the construction of our railroad, and when completed he believes it will have many advantages that ours do not possess. He speaks in the most flattering terms of the climate and soil of our State, of the broad dimensions our city has attained in the short period of its existence, and of our institutions, while the business character of our citizens has not escaped his notice. He will leave tomorrow for Victoria on business connected with the Canadian Pacific railroad.

By Electric Telegraph, Exclusive to the Colonist.

LAST NIGHT'S DISPATCHES.

Eastern States.

New York, Aug 18—Some scoundrels sent to several newspaper offices last evening, a dispatch purporting to have been sent from Norfolk to Isaac Walker, Vice President of the Sun Insurance Company, announcing the burning steamship Henry Chauncey, near Body Island, on the Virginia coast. Mr Walker declared a forgery. It is evidently a Bear the Pacific Mail stock.

Fortress Monroe, Aug 18—The wrecking steamer Resolute passed here this morning having in tow for Norfolk the steamer W. G. Patten, which was sinking off Fort Point. The above dispatch shows conclusively that the report that the Resolute had gone to the wreck of the steamer Henry Chauncey off Body Island, N.O., is untrue and that the whole story about the Henry Chauncey is a canard.

New York, Aug 18—The members of the Citizens Association who recently asked the Mayor for information as to the city accounts stating that unless he acquiesces himself of the charges against him he should withdraw from his position, have received a printed reply from the Mayor, who says, he returned the association the communication sent him because it is one that no gentleman could receive or should have signed because it is incorrect and untrue in many particulars. The Mayor declares that his supporters at the last election were satisfied with him, and now he will do in his office what his official oath and judgment may require. While grateful for courteous advice, he rejects threatening language and insulting communications. The attorneys for the contestants for the ownership of the Jewel estate gave notice today that no sale of that property would be made. The report was that the Ex-Emperor Napoleon was negotiating for it.

Oregon.

Portland, Aug 18—The bark Almatia from San Francisco reached this port yesterday morning.

The bark Webfoot from San Francisco arrived in this afternoon.

The bark Skiddaw will commence loading with wheat for England in a few days.

The Doreby will commence discharging early on Monday morning.

The bark Garibaldi which recently arrived from Hong Kong is lying at Moffat's wharf awaiting a charter.

Second Dispatch.

Europe.

Paris, Aug 18—Negotiations for complete evacuation of France are still pending.

London, Aug 18—Fresh strikes have broken out among the workmen of Leeds who demand a reduction of the hours of labor. Hundreds of new hands arrived at Newcastle to supply the places of striking workmen.

In the house of Commons today, Graves, member for Liverpool, confirmed the report that one franc per ton will be exacted by France as a tonnage tax upon all vessels entering French ports.

London, Aug 18—The Conference now in session suggests that at the conclusion of the international treaties between all the Great Powers, including America, the establishing of a uniform rate of postage regardless of distance for 22 countries when pre-paid, and 40 countries when unpaid, with an additional charge on letters that go by sea.

Paris, Aug 18—The 'Patrie' says Russia is making great preparations. Prussia is also filling up her corps, perfecting her armaments and collecting large quantities of stores. The 'Patrie' believes the preparations of the latter power are aimed at Russia.

London, Aug 18—The question of the prolongation of their power will probably report next Monday. The debate will be opened on Tuesday.

Oregon.

Portland, Aug 19—Sailed—Steamer Gussie Tellair for Victoria.

Biliousness and Indigestion.

These two complaints are more general at this season of the year than at almost any other. They are closely akin; for biliousness always involves an impaired digestion, and indigestion is necessarily an accompaniment of a disordered or torpid liver. Happy the man or woman who has been afflicted with either of these ailments, who has not felt the horrors of dyspepsia, and to whom that great secret agent the liver, has never given pain or trouble. Not one in a thousand can lay claim to entire immunity from irregularity in these organs. How, then, shall they be regulated? Not by powerful cathartics, alternated with ordinary stimulants, but by a medicinal invigorant, like Hostetter's Stomach Bitters, which combine in due proportion the tonic and the alterative principle. Wherever there is a church, schoolhouse, and a general store, this famous medicine may be procured. No village merchant finds it prudent to be without it, for it is required for every day by every class. The workingman buys it because it increases his capacity for toil, and is followed by no reaction. The effect of the salubrious roots, herbs, etc., of which it is composed, diffused through his whole system by the pure stimulant which forms the basis of the Bitters, is most healthful and invigorating. The scholar, the merchant, and in fact all men whose minds or bodies, or both, are in constant exercise, will derive benefit from its use. To persons of sedentary habits it supplies in some measure, that activity in the circulation which is obtained by physical exertion, and is the best known remedy for constipation.

Ask for Hostetter's Stomach Bitters, and do not be deceived in purchasing any of the imitations and frauds sometimes offered in its stead.

To the Electors of Yale-Lytton District.
GENTLEMEN—HAVING BEEN RE-
quested by a number of the electors to allow myself to be nominated as your representative in the Legislature for the Province of British Columbia, after due consideration, I have much pleasure in acceding to that request and should you permit me to say that I am happy to be elected, and I will do my utmost to support such measures as will promote your interests and those of the country at large.
I am in favor of increased postal communication and a liberal non-sectarian school system; the abolition of road tolls; improving and making of trails and wagon roads in agricultural and mining districts; increased facilities for the transportation of goods; the prompt passage of the Civil Bill and all extraneous expenditures of public money.
I have at present merely touched on those subjects that I have the first place in the public mind, but shall be happy at any future time to hear your views and express my own more fully.
I have the honor to be, Gentlemen,
Your obedient servant,
GEORGE COXON.
Quenelle, July 28th, 1871. aul7

Political.
To the Electors of Nanaimo District.
GENTLEMEN—With such a Requisition before me, I cannot hesitate to accept the nomination to represent the important District of Nanaimo in the Local Legislature; nor, with such support, so cordially proffered, can I feel that I am undertaking a task which I shall feel to be a duty. Most of you are already very familiar with my political views, that anything like an extended delineation of them would be superfluous. I am, however, in the present session, and in coming before you for election, I am conscious of the great responsibility which I am about to assume. I am, therefore, prepared to do my utmost to support such measures as will promote your interests and those of the country at large.

Medical.
DR. J. COLLIS BROWNE'S
CHLORODYNE.
IS THE ORIGINAL AND ONLY GENUINE.
CAUTION—Victor Chancellor Sir W. P. Wood stated that Dr. COLLIS BROWNE was undoubtedly the inventor of CHLORODYNE; that the story of the defendant, Freeman, being the inventor was deliberately untrue which he regretted to have sworn to. Excellent testimonial from a physician of London stating that Dr. COLLIS BROWNE was the inventor of Chlorodyne; that they prescribe it largely and mean no other than Dr. Browne's—See Times, July 12, 1867.
The Public therefore are cautioned against using any other than
Dr J Collis Browne's Chlorodyne,
REMEDIAL USES AND ACTION.
This INVALUABLE REMEDY produces quiet, refreshing sleep, relieves pain, calms the nervous system, restores the deranged functions and stimulates healthy action of the secretions of the body without creating any of those unpleasant results attending the use of opium. Thousands of persons have borne witness to its marvellous good effects and wonderful cures, while medical men extol its virtues most extensively using it in great quantities in the following diseases:
Diseases in which it is found eminently useful—Cholera, Dysentery, Diarrhoea, Colic, Coughs, Asthma, Cramp, Rheumatism, Neuralgia, Cough, Hysteria, &c.
The Right Hon. Earl Russell communicated the College of Physicians and J. T. Davonport that he had received information to the effect that the only remedy of any value in Cholera was Chlorodyne. See Lancet, Dec 31, 1864.
From A. Montgomery, Esq., late Inspector of Hospitals, Bombay: "Chlorodyne is a most valuable remedy in Cholera, Typhoid, and Dysentery. It is fairly well known to the medical profession, and its use is rapidly increasing, and when other medicines have failed."
Dr. Lowe, Medical Missionary in India, reports [Dec 1865] that in nearly every case of Cholera in which Dr. J. Collis Browne's Chlorodyne was administered, the patient recovered.
Extract from Medical Times, Jan 10, 1866—Chlorodyne is prescribed by scores of orthodox medical practitioners. Of course it is not a new remedy, but its singularly popular did not supply a want and fill a place.
Extra. From the General Board of Health, London, to its ally in Cholera. "So strongly are we convinced of the immense value of this remedy that we cannot too forcibly urge the necessity of adopting it in all cases."
Beware of spurious and dangerous compounds sold as Chlorodyne which with frequent fatal results have followed.
See leading article, Pharmaceutical Journal, Aug 1, 1869 which states that Dr. J. Collis Browne was the inventor of Chlorodyne; that it is always right to use his preparation.
Sole Manufacturer, J. T. DAVENPORT, 33 GREAT RUSSELL STREET, LONDON, W.
Sold in Bottles, 1s. 1/4, 2s. 9d., and 4s. 6d. j4
